## MINING, BUSINESS AND STOCKS

## HUMBOLDT MINE COMING TO FRONT

Immense Body of Low Grade Gold Ore Developed in the Saphire-Union Property.

### VEIN IS NINETY-TWO FEET WIDE

Values Run from \$2 to \$5 in Gold-Ore Concentrates 20 Into 1-- Milling Facilities Proposed.

The Saphire-Union mine, located within two and one-half miles of the Sheba property, in Humboldt county, Nevadá, is developing into a proposition of importance, and, according to Manager William G. Adamson, who departed for the camp last night, after a stay of two weeks in the city, it is to be equipped with modern milling facilities at no distant day.

Although Mr. Adamson has had charge of the property scarcely more opment work as vigorously as he could have done, he has nevertheless made some startling revelations in the way of opening up enormous bodies of low grade sulphide ores. It has been the policy of Mr. Adamson and associates to move along unostentatiously. They have preferred to determine the worth of their property before saying very much about it. If it proved to be a good mine, they were willing that the public should know it; while if it turned out to the contrary, they argued, the least said, the better. The company is practically a close corporation and there has been no exploitation of it in the stock markets. Those interested have put up their own money and asked

put up their own money and asked favors of no one.

Before leaving for camp, Mr. Adamson gave the "News" some information concerning what has been done in the way of development. The ground has been opened by a tunnel, been driven into the mountain for a distance of 150 feet. At this point the vein was encountered, and a cross-cut run into it disclosed the fact that it contained a width of 92 feet. The vein contained a width of 92 feet. The vein goes down almost perpendicular; on the foot wall, are four feet of white min-eralized taic and on the hanging wall about two feet of the same substance. The vein matter consists of a porphy-retic quartz, impregnated with iron pyrites which contains gold values The composition of the ore is such, Mr. Adamson states, that it makes a most excellent concentrating proposition, the reduction of 20 tons into one being

The water problem, a serious one for many Nevada mining corporations, has been solved so far as the Saphire group is concerned, for Mr. Adamson explains that an ample supply for the operation of a large mill flows out of the lower tunnel. Measurements made some time ago disclosed the fact that about 180,-

Preparations are now under way to prosecute a vigorous campaign of de-velopment, and among the things to be done will be the extension of the tunnel for another 300 feet. Lumber is on the ground for several new buildings, which in boarding house. includes a commodious

The Saphire group consists of 10 claims in all, and Mr. Adamson looks upon it as one of the coming big mines of Humboldt county.

The Independence mine, near Winne-

muca, is another likely proposition being developed under the management of Mr. Adamson. This property has produced, it is claimed, as much as \$700,000 back in the 60's, when the rich surface silver deposits were worked out. Two mills were operated on ore from the Independence in those days, and the richer ore was transported to the coast and thence shipped to Swan-Bea. Wales, for treatment,

### IT WAS CIRCUS DAY.

Too Much Excitement on the Streets or The Stock Brokers.

This is circus day, sure enough! Such were the words spoken by a frequenter of the Mining Exchange rooms soon after the morning call.

The sales were confined to four stocks, and these were transferred dur-

ing the regular session of the board The appearance of the parade on Sec ond South street soon put an end to the bidding and nothing whatever done on the open board. Daly-West found a few buyers and the stock dropped from \$13.50 to \$13.40 per share. Some Century was brought out on declining figures, while Yankee Con. was bought to at 36½ cents. The bidding for Tonoth pah stocks failed to attract any one and they were passed without any pales.

The closing quotations and sales were

MINING IN MEXICO.

Say of Conditions There. Edward M. Conley, vice consul gen-

What Consul Edward M. Conley Has to

eral at Mexico City, Mexico, has made a report on conditions in that country as regards to American investments and warns the "uninitiated" to look out for fake concerns alleged to own property there. He says:

The same general laws govern success in mining in Mexico as in agrituiture. Any person who invests in a mining enterprise in Mexico, should be a man of small capital, should either

be a practical mining man himself, or have the opinion of an expert whom he knows personally to be perfectly re-liable. It is true that mining is more or less a hazardous enterprise at best; but the investor in a mine who looks upon his investment as being in the nature of a lottery ticket, and will most certainly reap the same reward as if he had purchased a lottery ticket-that is, almost always nothing. The experienced man in mining is the only one who stands a reasonable chance of being successful. It is a safe general advice to all others to strictly avoid mining stocks. There are, of course, excep-tions to all rules, and occasionally an inexperienced man makes money from an investment in mining stocks, but it must not be forgotten that a million others have lost money in similar attempts. Investments of any size in mines in Mexico are usually made after

careful investigation, and with such investigation this article is not concerned. It is desired chiefly to warn Americans working for small salaries against mining stocks in Mexican mines which they know nothing about except from prospectuses. To illustrate the methods of fake mining comparies, I know of one company claiming Milwaukee as its headquarters, which has recently been advertis-ing extensively its stock in a mine in

Mexico. I happen to know that this company does not hold title to a toot of land or a dollar's worth of property in Mexico. It holds some denouncements of mining claims in the state of Michoacan, but does not yet hold title to these claims. Even if it did hold to these claims. Even if it did hold title, they are mere prospects upon which absolutely no development work has been done. Yet the company, styling itself with the name of the mine it is advertising, claims that the mine is fully developed, is in actual operation, and is about to pay large dividends. It offers to sell stocks to investors at ridiculousy low prices, and states that it holds in reserve five other fully de-veloped mines for the protection of its stockholders. It offers to send samples of its ore to any prospective purchaser of stock, when it is known that not an ounce of ore of any kind has ever been taken from the claims. As a climax of "nerve," it offers to pay the expenses of a trip to Mexico of any prospective purchaser of a certain large amount of stock, for the purpose of allowing the purchaser to visit the mine to satisfy himself that it is bona fide. It publishes pictures of another large and rich mine, showing buildings, machinery, etc., la-beling them with its own name. The advertisements are so constructed to be very misleading to an uninformed per-son, and no doubt many will be induced to invest upon a mere statement of some reason the offers to send per-sons to Mexico free of expense to insons to Mexico free of expense to investigate this and similar properties is never made use of. If it were, this warning would have no purpose. If the investors would only force the com-

panies to prove their statements, they would probably not be investors. Another Morrison Suit.

Suit has been filed in the district court Eliza Snow Dunford against the Morrison Mining company to recover \$907.21 alleged to be the balance due on

## LABOR SURPLUS REPORTED IN ALTA

While the Camp Has Not Been as Lively in Many Yerrs Positions In Mines Are Well Filled.

COLUMBUS CONSOLIDATED MILL

Is About Enclosed-Progress at the South Columbus-The Pittsburg Of American Fork.

Special Correspondence. Alta, Aug. 9 .- Every day adds to the activity of this old camp. Many men are employed here, but the place is overstocked at the present time. At the Columbus Con, mine,, the

machines ar e pounding away to make connections between the Howland and Columbus tunnels, the completion of which will facilitate the handling of the cres, the mill ore going through the Howland tunnel direct to the bins at the mill, while the shipping ore and waste rock will be taken through the Columbus tunnel. The compressor is giving excellent satisfaction and the Columbus Con, company is operating a station pump, hoisting engine, feed pump and two machine drills, with power derived from it, also supplying air for drills at the Alta-Quincy and South Columbus mines. The Columbus mill is almost enclosed, and Contractor Shea has commenced putting the machinery in place, which is all on the ground with the exception of the motors. The mill

is an excellent structure and a credit to any mining camp.

At the South Columbus the machine drills are forging ahead at the rate of five feet per day in the tunnel, while another force of men are erecting buildings to be used as a blacksmithshop, carpenter-shop, etc.

The Alta-Quincy company is rushing its tunnel and has recently cut through

a purphry dyke. The No. 3 fissures in which a good grade of shipping ore will likely be opened, will soon be encoun There is considerable amount of gos sip over the recent strike at the Pitts-burg, in American Fork, but the ex-

tent of it is not known here.

Mr. Joseph Mattson has completed his new hotel so that there is now better accommodations for the traveling public of which a large number are coming all the time, especially mining experts, who are examining mining properties. Indications are favorable for the resurrection of a number of the old mines, which produced heavily back

in the '70's.

The young people of the camp have taken up a subscription, and with the proceeds have built a dancing pavilion 20x40 feet, in which the light fantistic is merrily tripped, thus passing many pleasant hours.

AT THE FARMINGTON WELL. Drill is Said to Have Reached the Depth Of 1800 Feet.

Charles K. Rowland, one of the mov charies k. Rowland, one of the moving spirits in the promotion of oil enterprises in the Great Salt Lake valley, visited the Guffey and Galey well at Farmington yesterday accompanied by several others. A crew of men is steadily at work, Mr. Rowland said today, and the drill is down about 1 wood. day, and the drill is down about 1,800 feet and is still passing through a hard sandstone formation with an occasional strata of brownish conglomerate. Mr. Rumbaugh, the superintendent, received a drive head from Chicago vesterday and is successfully putting down casing.

The water well, which was recently sunk close to the big well, is emitting a large flow of gas, which Mr. Rumbaugh is thinking of utilizing under his boilers as fuel. A great deal of gas is in the main well but for obvious rea-sons no attempt will be made to use it.

HANDLING USUAL TONNAGE. Utah Copper Mill at Bingham Running At Full Blast.

General Manager Jackling of the Utah Copper company was in commu-nication with Supt. Janney at Bingham during the day, and the latter informed him that the mill was again hand-ling the usual tonnage of ore. The diffi-culty with the water in the shaft, from which the big plant is supplied, is un-der control and no more trouble is anticipated. The deep sea divers employed by the company to locate the reent difficulty have returned to San

STRIKE AT FISH SPRINGS. Supt. Crismon Reports Important Find In Utah Mine.

Secy. Weiler of the Utah mine of Fish Springs was in receipt of a let-ter from Supt. Crismon today, which contained the information that a fine \$907.21 alleged to be the balance due on account between the defendant and alleged to be the balance due on account between the defendant and countered on the fifth level. The letter was lacking in details concerning the new find, but Mr. Crismon added

that the mine has not looked as well as now in a long time. Another ship-ment of ore will be forwarded to the local smelters within a few days

ARIZONA COPPER OUTPUT.

Big Producer Turned Out 1391 Tons During July. The output of the Arizona Copper company for the month of July was

1,391 short tons, as against 1,148 tons for the previous month, an increase in production of 243 tons. The old A. C. is one of the most steady producers in the territory, and while its ore is of a low grade, it is nevertheless one of the best grade, it is nevertheless one of the best dividend payers in the country. The results for the half year to March 31, show profits, including £14,863 brought ferward from Sept. 30, 1993, of £163,580. The dividends for the half-year on the A preference shares and 7 per cent preference shares and 7 per cent A preference shares and 7 per cent preference stock amount to £12,266, leaving the sum of £15,314. On July 27 interim dividend on the preferred ordinary shares, amounting to £167,859 was paid, besides carrying over a large reserve fund. In addition to these dividends, and the redemption of outstanding indebtedness, which is now about wiped out, the A. C. company is continually making many improvements to its plants and mines. The record of the A. C. company is just about as satisfactory as that of any other company, and its future is certainly as bright.—Clifits future is certainly as bright.-Clifton-Morenci Mining Bureau.

### THE MAJESTIC MINES.

Supt. Freudenthal Pushing Development Work Energetically.

Henry Rives Ellis, the well known metallurgist, who has been making a round-up of the Majestic properties in Beaver county, believes Superintendent Ed F. Freudenthal is going to be ready to report some important developments in the near future. Mr. Eilis was not much impressed with some of the work executed by those who had charge of the mines in the past, but feels confident that Superintendent Freudenthal

is on the right track.
At the Old Hickory mine the superintendent is sinking the shaft to a point 100 feet below the old tunnel workings where he expects to run a level and get under the large body of ore opened in the tunnel above.

Conditions are working out all right at the O. K. mine, and Mr. Ellis sees no reason why some good bodies of ship-ping ore should not be developed there. At the Harrington & Hickory mine, in the Star district, good ore exists in the bottom of the 200-foot shaft. Paralleling the ledge is a gold-silver quartz ledge. Superintendent Freudenthal has a force of men working on the latter and is very hopeful of getting satisfactory results therefrom.

### CONCENTRATES.

The Mammoth dividend of \$20,000 is payable next Monday. Senator A. B. Lewis is again reported en route from New York.

The United States tramway in Bingham is in operation again. Joseph Dederich will leave for Bea-

ver county again on an early train. The usual dividend of the Silver King Mining company will be posted today. Supt. H.E. Van Housen of the Copper

Chief Metallurgist A. F. Bettles will depart for the east tonight on a brief busines trip.

The assessment on the stock of the South Columbus Mining company becomes delinquent tomorrow. Arrivals from Stockton say some im-

portant developments have taken place in the Bullion mine in that camp. It is expected that the directors of the Horn Silver will post another div-idend of \$20,000 at their forthcoming

meeting. William Bayly, Jr., manager of the Copper Belt railroad, is expected to ar-rive home from Los Angeles this after-

Only 2,000 shares went delinquent on the late Albion assessment of 2 cents a share. Probably this will be taken care of before sale day. W. C. Thomas, superintendent of con-

struction for the Newhouse Mines & Smelters corporation, departed for Beaver county again last night. Some ore has been encountered in the Albion tunnel, now being driven at Al-

ta, but it has not reached the point where large bodies are expected. The ore and bullion settlements re

ported late yesterday were as follows: Crude ore and concentrates, \$59,600; base bullion, \$35,900; gold bullion, \$3,200. John C. Lynch, a brother of Thomas J. Lynch, the young Nevada millionaire

mining operator, has taken a position with the Nevada mines company, at Reveille, in that state, Supt. Samuel McIntyre, Jr., of the Mammoth, reports the strike of a good body of lead ore on the 1,000-foot level of that property. The find was made in the cross-cut being run to connect with the gold bearing channel. Assays revealed values of 46 per cent lead, 110 ounces silver and \$4 in gold.

Charles L. Dignowitty departed last Charles L. Dignowitty departed last night for Seattle, where he will join the members of his family, whence they will proceed on a journey through Yellowstone park. Mr. Dignowity expects to reach Portland in time for the meeting of the mining congress. He feels confident that Sait Lake is going to win the fight for permanent headquarters and he will be on hand early in the game to help the Utah delegation in the contest.

Articles of incorporation of the Independence Copper & Gold Mining com-pany, organized in this city, were filed in the office of the county clerk yester-day. The capital stock of the company day. The capital stock of the company is \$50,000, divided into 500,000 shares of the par value of 19 cents each. The company has seven claims in the Little Cottonwood mining district. Charles Park is president of the company; Frank Birch, vice president; E. O. Leatherwood. Leatherwood, secretary and treasurer, and E. R. Morgan, superintendent and general manager.

We beg to announce that Mr. Fred Harris has this day severed his connection with this company for which he was formerly sales agent. Rand Drill company, New York, July 20, 1904.

# FRACTION HIGHER

Depression in the London Market Was Not Reflected in New York.

SUCAR MADE A BIG ADVANCE.

Amalgamated Copper Gained a Point -Steel Was Heavy-Bonds Firm.

New York, Aug. 10 .- The depression in the London market had but slight effect on the opening dealings in the stock market here today, and prices were generally a fraction higher. Sugar preferred sold 1% higher. Metropolitan Street railroad broke into activity and shot up 1% on large dealings. Metropolitan Securities and Third Avenue rose over a point in sympathy. The effect on the general list was moderate. Amalgamated Copper gained about a point. United States Steel preferred continued heavy, below last night's level. A reaction of 14 in Metropolitan Street railway caused an easier tone elsewhere, and some of the prominent stocks fell below last night. Some strength developed in the Southwesterns, led by Missourl Pacific with a rise of over a point. Pacific Mail and Smelting

over a point. Pacific Mail and Smelting rose about a point.

Bonas were firm at noon.

A rise of 1% in St. Louis-Southwestern preferred was due to movement of southwesterns. Sugar rose strongly 1%, but the general list was unresponsive and prices hung suspended.

The speculation shifted to Metropolitan Securities, which had not responded notably to the rise in the Street Railway stocks. It was run up rapidly on very large transactions to 33, a rise over night of 4%. Sugar reacted a point. Southern Pacinc and Rock Island preferred were lifted % and Denver & Rio Grande preferred 14, but the list generally was not more than steady and became rather easy when the rise in Metropolitan Securities culminated.
